Experience

Student Scholar

08/2019 - Current

Silver Eye Center For Photography | Pittsburgh, PA

The Scholars learn the ins and outs of working in an arts non profit, working towards developing a deeper understanding our mission. We also help to create artist-centered exhibitions, and support the creative and community based work we do. Scholars at Silver Eye gain fine art skills through working in the digital photography work space, the Lab at Silver Eye, and gain curatorial and research skills while assisting in the development and implementation of exhibitions at Silver Eye. We interact with artists and arts professionals in and outside of the gallery through field trips, and engage with our diverse and curious public audience at exhibition openings and programs, or while sitting at the gallery's front desk. Scholars at Silver Eye become an integral part of Silver Eye's creative community, and are a valued member of the team.

Photography Lab Technician

08/2017 - 04/2019

Point Park University | Pittsburgh, PA

As a Photography Lab Technician, I monitored both our color darkroom and our black and white darkroom, as well as our developing lab and digital scan lab. I helped students develop their film, make prints, or with any other issue they might have had. In addition to that, I mixed all of the chemistry for each lab, and I kept the facility neat and clean.
